

**E-News Update from MCIM**

**Safety and Drug-Free Workplace Credits**

Did you know that Florida contractors may be eligible for safety and drug-free workplace premium credits? Once an established safety program is in place, they may qualify to receive a 2% premium credit. To help your members get started, we can provide a sample plan for implementing safety programs in the workplace.

We also provide our policyholders with the documentation needed to establish drug-free workplace programs, which may make them eligible to receive a 5% premium credit.

These programs have been proven to reduce claims and, in the long-run, keep policyholders' costs down. Contact us for more details about our safety and drug-free credit information.
